FunnelIQ

Marketing-to-revenue attribution · Demo company: Freshworks (B2B SaaS) · 2,000 synthetic leads, ₹ lakh

1 · Where the funnel loses value

Red = stage conversion below benchmark. Tick marks show the benchmark rate.

2 · Revenue credit by channel

Attribution model: Data-driven (Markov)

Compare models: channels that dominate leads but earn little revenue are where marketing spend is leaking.

3 · FunnelIQ AI agent

Ask: where are we losing revenue? which channel is overrated?

Ask

How it works (algorithm)

1) Integrate ad platforms, web analytics, CRM and billing with identity resolution → 2) Build each lead's journey: touchpoints → lead → MQL → SQL → opportunity → won → revenue → 3) Measure stage conversion and compare with benchmarks → 4) Attribute revenue with first, last, linear, time-decay and Markov removal-effect models → 5) Score lead quality by channel (revenue per lead, cost per revenue) → 6) Quantify value lost at each stage = (benchmark – actual rate) × entrants × downstream yield → 7) Agent recommends fixes.
